

ABOUT DUBAI INTERNET CITY

Dubai Internet City (DIC) provides a strategic and cost effective platform for ICT companies targeting emerging markets in a vast region extending from the Middle East to the Indian subcontinent, and from Africa to Central Asia.

Launched in the year 2000, DIC now features a dynamic international community of ICT companies including global giants like Microsoft, Cisco Systems, IBM, HP, Dell, Siemens, Sun Microsystems, Computer Associates, PeopleSoft and Sony Ericsson. Many small and medium businesses (SMBs) and promising entrepreneurial ventures are also part of the community. The cluster comprises companies from a variety of sectors - Software Development, Business Services, Web Based and e-Commerce, Consultancy, Sales and Marketing and Back Office.

DIC provides an environment that attracts all elements of the ICT value chain, and in addition, has developed several programmes that can be leveraged by the community to explore and expand channel development opportunities. Companies are privy to an advanced Metro Ethernet broadband infrastructure and a range of business-enabling services including government transactions. DIC also has the world's largest commercial IP Telephony network.

DIC offers both 100 per cent tax exemption and 100 per cent business ownership.

Dubai Internet City provides key business, legal, technical and other support services, in a comfortable and hassle-free experience, to help companies set up operations and run them smoothly.

Entry into Dubai Internet City's vibrant and thriving community is marked by both ease and efficiency. DIC offers quick and easy services to companies wishing to set up businesses - new or existing, small or large - by ensuring that their very first steps in establishing themselves are both effortless and successful.
